PART 1: Install XAMPP

PART 2: Start Apache and MySQL

PART 3: Set Up the Project Files

Step 3.1 — Extract the ZIP

You'll get a folder called Smart-Library-Management-main containing SmartLibrary

Step 3.2 —Copy the SmartLibrary folder into the XAMPP's→htdocs folder.

PART 4: Set Up the Database

Step 4.1 — Open phpMyAdmin

Open your browser and go to:

http://localhost/phpmyadmin

Step 4.2 — Create the Database

Click "New" in the left sidebar

In the "Database name" field, type exactly:

Smartlibrarymanagement

Step 4.3 — Create the Tables

Click on your new database in the left sidebar, then click the SQL tab and paste this entire SQL script, then click Go:

→sql script start:

```
CREATE TABLE admin (
  id INT AUTO_INCREMENT PRIMARY KEY,
  full_name VARCHAR(100),
  username VARCHAR(50) UNIQUE,
  email VARCHAR(100) UNIQUE,
  password VARCHAR(255),
  phone_number VARCHAR(20),
  role VARCHAR(50),
  employee_id VARCHAR(50),
```

```
    address TEXT,
    security_question VARCHAR(255),
    profile_picture VARCHAR(255),
    default_language VARCHAR(20),
    time_zone VARCHAR(50),
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

CREATE TABLE books (
    id INT AUTO_INCREMENT PRIMARY KEY,
    isbn VARCHAR(20) UNIQUE,
    title VARCHAR(255),
    author VARCHAR(100),
    category VARCHAR(100),
    shelf_location VARCHAR(50),
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

CREATE TABLE patrons (
    id INT AUTO_INCREMENT PRIMARY KEY,
    name VARCHAR(100),
    email VARCHAR(100),
    phone VARCHAR(20),
    card_number VARCHAR(50) UNIQUE,
    guardian_id INT,
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

CREATE TABLE loans (
```

```
    id INT AUTO_INCREMENT PRIMARY KEY,
    book_id INT,
    card_number VARCHAR(50),
    checkout_date DATE,
    due_date DATE,
    return_date DATE,
    status ENUM('borrowed', 'returned') DEFAULT 'borrowed',
    FOREIGN KEY (book_id) REFERENCES books(id)
);

CREATE TABLE reservations (
    id INT AUTO_INCREMENT PRIMARY KEY,
    book_id INT,
    card_number VARCHAR(50),
    reserve_date DATE,
    FOREIGN KEY (book_id) REFERENCES books(id)
);

CREATE TABLE donations (
    id INT AUTO_INCREMENT PRIMARY KEY,
    donor_name VARCHAR(100),
    book_title VARCHAR(255),
    `condition` VARCHAR(50),
    decision VARCHAR(50),
    donation_date DATE
);

CREATE TABLE stafff (
    id INT AUTO_INCREMENT PRIMARY KEY,
```

```
    name VARCHAR(100),
    email VARCHAR(100) UNIQUE,
    password VARCHAR(255),
    role VARCHAR(50),
    permissions TEXT,
    status VARCHAR(20)
);
```

←sql script end.

After clicking Go, refresh the left panel — you should see all 7 tables listed under smartlibrarymanagement.

PART 5: Verify the Database Configuration

Open this file in text editor (VS Code):

C:\xampp\htdocs\SmartLibrary\admin\model\db.php

You'll see:

```
php$DBHost = "localhost";
$DBUser = "root";
$DBPassword = "";
$DBName = "smartlibrarymanagement";
```

If set a MySQL root password, replace " "

PART 6: Run the Project

Step 6.1 — Open the App in Your Browser

Signup page (create your admin account first):

http://localhost/SmartLibrary/admin/View/signup.php

Login page:

http://localhost/SmartLibrary/admin/View/login.php

After logging in, you can access all features.
